

INTERNATIONAL COMPETENCE CENTRE RAIL

Hier können Sie auf DEUTSCH umschalten.

Knowledge that others can't provide -
first hand from the IRIS founder and co-author of ISO/TS 22163.

To really understand the IRIS standard!
customer-oriented. serious. competent.

PROSPECTS

THE CRISIS SEEMS TO BE OVER

We are optimistic. After a prolonged lull, there are now signs that our face-to-face events will be again in greater demand in the coming year. Due to current developments (see the following news), we have updated all seminar materials and are, as always, well prepared.

30 - 01 April

IRIS for Advanced (*IRIS extension course &. refresher*)
Berlin | C223 | [DETAILS + REGISTRATION](#)

CC-Rail's Newsletter Nov. 2021 incl. Training Schedule 2022

NEWS

- The number of certified companies continues to rise despite the Corona crisis. We currently have 2200 certificates as of October. The numbers are growing particularly dynamically in Asia and Russia. America and Africa are lagging far behind. Europe has only small increases. China is in first place (1258 certificates), followed by Russia (137) and Germany (136).
- The gold level was introduced after a one-year test phase. Since September 1, all silver-certified companies can aspire to the highest level, the gold certificate.
- The IRQB had completely revised three of its IRIS Guidelines: #1: KPIs, #3: Maintenance and #6: Special Processes. My opinion: well done! Now there is another IRIS Guideline: Guideline11: Customer Perception. Still in work are #7: Problem Solving (revision), #9: Small and Medium sized Enterprises and #10: Project Management.
[>> here you can find all guidelines and more](#)

If you discover something in this newsletter that might be of interest to your colleagues, please forward internally to your colleagues in the areas of **quality, project management, procurement and/or RAMS/LCC engineering**.

with best regards,
Andreas Heinzmann and your CC-Rail team
